Electronic Systems and AbleNet sign Multi-Year Partnership Agreement

Sioux Falls, South Dakota and Minneapolis, Minnesota, April 17th, 2006 – *Electronic Systems, Inc. and AbleNet today announced the signing of a multiyear agreement for Electronic Systems to supply substantially all of AbleNet's hardware products.*

According to Dave Binczik, Vice President of Operations, "AbleNet will be achieving a strategic goal of consolidating its manufacturing into a partner that has a demonstrated track record of high quality, robust supply chain management, and engineering/production support." Harvey Levitt, AbleNet's Supply Chain manager commented that, "Our focus in the past has been supporting our vendors in supply chain management, production procedures, quality control, working cost reductions, updating products to resolve compliance or production issues and preparing intensive quote packages. With this full partnership model, AbleNet can focus more on new product design and order fulfillment"

"As an EMS (Electronic Manufacturing Services) provider we rely on our customer's ability to market their products and grow their business. AbleNet has become a global leader in assistive technologies for people with disabilities because of their dedication to the concept of helping people and innovative product and program design that make a difference in people's lives." said Leo Reynolds, Vice Chairman.

"Our strength at Electronic Systems is the ability to execute; from supply chain management through order fulfillment, so when we engage with an industry leader like AbleNet, business opportunities abound for both companies", said Gary Larson, President.

AbleNet, Inc., one of the worlds leading providers of Assistive Technology solutions, provides innovative technology and programs that offer persons with disabilities opportunities to participate, learn and communicate in life's experiences. Products include: literacy tools, alternative augmentative communication aids, environmental controls, switches, mounting systems, and special education curricular programs. Feel free to visit www.ablenetinc.com for more information.

Electronics Systems, Inc. (www.electronicsi.com) is headquartered in Sioux Falls, SD and operates three facilities there. The company offers complete EMS (Electronic Manufacturing services) for PCB assembly through final system-level assemblies (Box Build) including supply chain management through order fulfillment. Customers include OEM's (original equipment manufacturers) in the industrial, electrical power, medical, business equipment, aerospace, consumer product, defense and telecommunications sectors. The company is ISO 9001:2000 Registered and has been recommended for ISO 13485:2003 Registration for medical product manufacturing.
